| <b>1 Secondary beams of rare isotopes</b>                    | <b>9</b>  |
| 1.1 Introduction . . . . .                                   | 9         |
| 1.2 Probability approach to high energy scattering . . . . . | 13        |
| 1.3 Isotope yield in high energy collisions . . . . .        | 17        |
| 1.4 Pauli blocking of nucleon-nucleon scattering . . . . .   | 21        |
| 1.5 References . . . . .                                     | 24        |
| <b>2 Nucleus-nucleus scattering at high energies</b>         | <b>27</b> |
| 2.1 Introduction . . . . .                                   | 27        |
| 2.2 Eikonal wavefunction . . . . .                           | 27        |
| 2.2.1 Green's function . . . . .                             | 30        |
| 2.3 Elastic scattering of spinless particles . . . . .       | 33        |
| 2.3.1 Coulomb amplitude and Coulomb eikonal phase . . . . .  | 34        |
| 2.4 Spin particles . . . . .                                 | 37        |
| 2.5 Total reaction cross sections . . . . .                  | 38        |
| 2.6 The “ $t\rho\rho$ ” approximation . . . . .              | 39        |
| 2.7 Inelastic scattering . . . . .                           | 42        |
| 2.8 Glauber theory of multiple scattering . . . . .          | 44        |
| 2.9 References . . . . .                                     | 46        |
| <b>3 Sizes and energies of exotic nuclei</b>                 | <b>47</b> |
| 3.1 Introduction . . . . .                                   | 47        |
| 3.2 Reaction cross sections . . . . .                        | 48        |
| 3.2.1 Harmonic oscillator model . . . . .                    | 52        |
| 3.3 Halo nuclei . . . . .                                    | 56        |
| 3.4 Microscopic calculations of nuclear densities . . . . .  | 58        |
| 3.4.1 Hartree-Fock theory . . . . .                          | 58        |
| 3.4.2 The Skyrme interaction . . . . .                       | 61        |
| 3.4.3 Relativistic mean field theory . . . . .               | 63        |
| 3.5 Nuclear density calculations . . . . .                   | 67        |
| 3.6 Intermediate energy experiments . . . . .                | 70        |
| 3.7 Reaction model with few-body wavefunctions . . . . .     | 73        |
| 3.8 Cluster aspect correction of $\sigma_R$ . . . . .        | 78        |
| 3.9 Mass measurements of exotic nuclei . . . . .             | 78        |
