

Contents

Foreword	ix
1 Classical and quantum scattering	1
2 The partial-wave expansion method	31
3 Formal scattering theory	69
4 Compound nucleus reactions	109
5 Fusion and fission	161
6 Direct reactions	203
7 Nuclear reactions in the cosmos	255
8 High-energy collisions	323
9 Relativistic collisions	373
Index	408
