

TMGT 599 – Technology Management Practicum (+ Comps) COURSE SYLLABUS: Fall, 2024 (248)

Instructor: Jason Lee Davis, PhD – Associate Professor & Sr. Grad. Faculty
Office Location: Charles Austin Engineering Technology Bldg. (Ag/ET), 213C
Office Hours: See [Instructor Schedule](#) on faculty webpage and below.
E&T Department Phone: 903-886-5474
E&T Office Fax: 903-886-5960
University Email Address: Jason.Davis@tamuc.edu
Faculty WebPage URL: <http://www.JDavis.us/> or
<http://faculty.tamuc.edu/jdavis/>
Class WebPage URL: <http://faculty.tamuc.edu/jdavis/tmgt/599/248/>
Courseware URL: <http://myLEOonline.tamuc.edu/>

COURSE INFORMATION

CRN: 81609 (.01W) **Program CIP Code:** 15.0612.00.19 – [Industrial Technology/Technician](#)

Term: 16-week main term (August 26 – December 13, 2024)

Delivery format: On-line, Web-based section – No required physical meetings.

Semester Credit Hours: 3 SCH

Catalog Course Description:

This capstone course experience serves as the opportunity for students to demonstrate and document their program learning experience and mastery of expected/required program of study competencies, goals, and learning outcomes within the Master of Science degree in Technology Management. Additionally, administered through this course will be the Master's Comprehensive Examination that will assess the student's mastery of concepts taught in the required major core courses. This course is to be taken during the final semester of coursework in the TMGT program following the completion of all, or all but one, of the other core courses.

Prerequisites: Must be core-complete or may be taken concurrently with one remaining core course.

Textbook (required):

Title: Publication Manual of the American Psychological Association, 7th edition (2020)

Author: American Psychological Association

APA Item #: 4200074 (softcover)

Pages: 428 pages

Format	Item#	ISBN-13	List \$US
Softcover:	4200074	978-1-4338-3216-1	\$31.99
Spiral Bound:	4200076	978-1-4338-3217-8	\$44.99

Publication date: October 2019

Format availability: <https://apastyle.apa.org/products/publication-manual-7th-edition>

Course/Program Student Learning Outcomes:

Graduates of the Master of Science in Technology Management program at Texas A&M University-Commerce will...

1. evaluate and defend leadership and organizational strategies associated with technology-intensive enterprises,
2. summarize and explain organizational development and strategies common to technology-intensive enterprises,
3. formulate and assemble component ideas in order to successfully execute a project plan, and
4. analyze information in order to formulate effective solutions.

IMPORTANT NOTICE!!! Grading policies and requirements identified in this syllabus will be followed in this course with all students held to an identical standard. If you do not agree with any requirement herein, believe any of them to be “unfair” or “unreasonable,” or believe that less should be expected of you than your classmates to earn a comparable grade, you should IMMEDIATELY DROP this course and re-evaluate your dedication to academic integrity and success!

MASTER’S COMPREHENSIVE EXAMINATION

Final Comprehensive Examination for the Master's Degree - NOT for course credit

*Refer to Texas A&M University-Commerce Procedure
[11.99.99.R0.13 Examinations for Graduate Degrees.](#)*

Date Due: Friday, September 27, 5:00pm CT. Late submissions will not be accepted, an automatic "F" will be assigned on Comps, and you will be ineligible to graduate in the current term. You should, however, remain enrolled in and complete the course.

All master's degree candidates must satisfactorily pass a comprehensive examination covering course work within their master's degree program of study. For candidates pursuing the Master of Science Degree in Technology Management, the comprehensive examination will be a written response to a provided scenario and submitted online. The questions on the examination are designed to allow you demonstrate an appropriate level of competency in the Program Student Learning Outcomes listed above. The Comprehensive Examination is a requirement exclusive of any specific course and is therefore not counted for credit in this, or any other course. Evaluation of the comprehensive examination will be conducted by an advisory committee in the Department of Engineering & Technology and the final student grade will be recorded as PASS or FAIL. TurnItIn will be utilized to identify a similarity score for Comps submissions as an indication of originality of content. As the Comps Exam is intended to demonstrate the **candidate's** knowledge and understanding, the similarity score should be extremely low (at or near 0%). Only similarity detected in the student responses will be considered in the percentage of similarity. Similarity arising from the detection of the question segments, required formatting components, and reference lists will be manually deducted to determine the actual content similarity score. A similarity score in excess of 15% is considered questionable and will be reviewed for plagiarism. A similarity score exceeding 33% will be considered plagiarized work, either by virtue of intentional academic dishonesty or a lack of basic citation and reference skills expected and required of a master's graduate, and will result in an automatic FAIL on Comps, unless a committee evaluation for plagiarism shows clear evidence to the contrary. The committee's decision is final. A candidate who fails the comprehensive examination must complete whatever further courses or additional study that are stipulated by the advisory committee. This additional work must be satisfactorily completed, and the comprehensive examination must be taken again and passed before the student will be eligible for graduation. If

failed, a second comprehensive examination attempt may NOT be made during the same semester. The student must re-enroll in TMGT 599 in a future term to retake the Comps a second time. To ensure the continued validity and integrity of the examination process, department and program procedures prohibit faculty from disclosing or discussing the details of exam responses with students. Requests for meetings to discuss comps responses will be declined by faculty. Any feedback deemed appropriate and approved by the program committee will be disclosed as warranted via the comprehensive exam coordinator.

The Master of Science Degree in Technology Management Comprehensive Examination is administered as a component of this course but is a program requirement exclusive of any specific course and as such the results will not be calculated in the final student grade for this course. Likewise, assignments in this course do not count toward any comprehensive examination requirement. Passing or failing either TMGT 599 or the Comprehensive Examination does not affect the other.

Completed comprehensive examination responses MUST be submitted to the designated location by the due date/time specified. No late submissions will be accepted. Failure to submit comps as and when required will result in an AUTOMATIC FAILURE of the exam and graduation will not be approved for the present term.

ASSESSMENT OF PROGRAM OUTCOMES

The Comprehensive Examination responses will also be utilized to assess the program outcomes identified in the Course/Program Student Learning Outcomes in the Course Information section above. This assessment of Institutional Effectiveness is programmatic in nature and results are not reflected in course grades.

COURSE REQUIREMENTS

Course-Credit Activities

Course Case Study Project – Value 250 points.

Due before midnight, Tuesday, Week 15

Following completion of the Master's Comprehensive Examination, the major course project will begin. This activity will require extensive outside readings and research on specific topics identified in the assignment guidelines. It is a reasonable expectation that skills and tools used throughout the program will be utilized in the production and delivery of the project. Your original scholarly project is to be created based on the specific assignment criteria.

Assignment specifics will be provided in the class at the time of project commencement.

Topics and scope for the Course Project may be intentionally derived from or related to research agendas of university faculty members. Projects or components, of sufficient quality could be selected by appropriate faculty for incorporation into professional manuscript(s) for publication. If an individual's work is selected for such inclusion, the faculty member, as co-author of the manuscript, may contact the student and co-authorship of the manuscript, or appropriate acknowledgement, will be offered as warranted by the extent of substantive individual contribution to the content of the final work.

Grading

Course Case Study Activity 250 points

Final Letter Grade via Points Earned – 250 points possible

Total Points Earned	%	Grade
223.8 – 250	89.5-100	A
198.8 – 223.7	79.5-89.4	B
173.8 – 198.7	69.5-79.4	C
148.8 – 173.7	59.5-69.4	D
< 148.8	< 59.5	F

Note: The point ranges take into account traditional rounding based on a maximum score of 100%. (e.g. 223.5, 223.6, & 223.7 round to a “B”. 223.8 & 223.9 round to an “A”.)

Your instructor genuinely desires to see all students perform exceptionally well and earn a passing grade in this course. Likewise, your instructor also firmly believes in a student’s right to fail, and shall not deny you that right should you so choose to earn that grade by virtue of your performance, or lack thereof, in this course. **YOU** determine your grade in this course by your performance, **NOT** the instructor!

Non-credit Activities (other than Comps)

Certain activities may be required as part of the course but not be entered in the gradebook as credit activities. Such activities could include the introduction and roster photo posting, course intro activity, or other related activities. Although not conducted for credit, completion of certain activities may be required as internal prerequisite activities before proceeding to the credit-earning activities is permitted. For example, an initial prerequisite quiz/acknowledgements covering the syllabus, academic honesty requirements, and other general course understandings will be administered requiring a score of 100% before further advancement in the course is permitted. If you cannot see content in the course beyond Week 1, check to ensure you have fully satisfied this requirement.

Assignment Submissions

Assignments MUST be submitted in the designated location to be considered submitted. (e.g. – If you upload a document to a location other than that in which it is required to be uploaded, it is NOT submitted. If a project link is posted or shared anywhere other than the required, designated location, it is NOT submitted.) Assignments MUST be completed and correctly submitted by the designated due dates and shared as required to be considered for full credit.

Submitted work must be readable and printable using the native format of software specifically identified for use in the course, typically a commonly available Microsoft product (included in Office Suite), or Adobe Acrobat (.pdf format). Any other formats will not be accepted without prior approval. Students must retain electronic copies of all submitted works and have available for resubmission should unforeseen technical circumstances warrant.

The writing and reference formatting style identified in the current edition of the *Publication Manual of the American Psychological Association* (APA) is required for use on written assignments in this course and all courses offered within the TAMU-C Department of Engineering & Technology. The most critical aspect of writing with APA in this course is the observation of correct citation and reference requirements. Failing to properly cite the work of others constitutes plagiarism, an act of academic dishonesty resulting in disciplinary action. The approved TMGT Manuscript Guide provides program specific information on required and allowed variations from APA Style.

These two sources are essential references in preparing written assignments for submission. Only specific assignment instructions supersede these established formatting and style requirements.

In the workplace, you are expected to produce documents that are clear, error-free, and visually effective in communicating the intended message. All work submitted for credit in this course must also satisfy these general professional expectations as well as be appropriate for the specific purpose and audience for which the communication is intended. Quality of work will be reflected in the assignment scores.

All coursework, excluding Comps, must identify the student and contain an appropriate assignment identifier within the document. Submissions without this required information will earn a grade reduction for that activity. This is part of “following instructions” and meeting the requirements of the course.

Electronic file submissions MUST conform to the following naming conventions if not specified otherwise in the assignment guidelines:

LastName,FirstName–Course Prefix&Number–Activity ID.FileExtension (no spaces in filenames)

Examples:

Einstein,Albert-TMGT599-Assignment.pdf

Tesla,Nikola-TMGT599-CourseProject.doc

Feynman,Richard-TMGT599-CaseStudy.docx

Important: Files uploaded into the LMS should NOT contain special characters such as the pound symbol (#). Attempting to upload a file with a restricted character could result in an error and failure of the upload process. For example, use Assignment1 rather than Assignment#1 in your filename.

Note: Specific assignment instructions may supersede certain requirements specified in this section. Follow assignment-specific instructions for maximum credit eligibility.

As you conduct outside readings and research, be familiar with the requirements of this course. As you read, take notes of points that you may wish to include in your assignment responses. After you have read and researched your source materials, review each assignment and begin to organize your thoughts as to the most effective, complete and concise response. Write a draft first, then read, **think**, and make necessary revisions. Repeat this process as many times as you need in order to produce **your best** response. Be careful of format, word usage, spelling, grammar and be sure to cite your sources, if applicable. Additionally, I will be looking for evidence that you have conducted outside readings and research and that you understood what you read. Write to your intended audience and at a level they can understand. Refer to the **MS-TMGT Manuscript/Assignment Guide** and **APA 7th ed. Style Manual**.

Timely submission of assignments

Assignments MUST be completed and submitted by the designated due dates, in the designated location. Some assignments may not be accepted late, for any credit. When eligible for late submission, full credit cannot be earned by late or incomplete assignments. Assignment credit is reduced by 10% of its value, or up to this amount at the instructor's discretion, for each day late if submitted after the posted due date/time. (e.g. Assignments may lose all of their value at 10 days past due.) Further, **late assignment submissions may be rejected** at the instructor's discretion. A challenge of the late acceptance policy above will likely result in the outright and immediate rejection of a late submission. Unless indicated otherwise, assignments may be submitted early; however, students should be aware that this does not imply that assignments will be graded prior to the

assignments' due date as assignments are typically evaluated as a group once all submissions have been received. All times specified in the course are in the Central Time Zone.

Due-dates may be listed in multiple locations throughout the course to assist you in keeping deadlines; however, the **Class Schedule**, available on the class public webpage, and embedded on the Schedule/Calendar page in the courseware, is the primary and definitive reference for official due-dates for class assignments. The calendar should be referenced for due-date confirmation on all assignments and in the event of any discrepancy between documents or date references within the course, the dates provided on the **official Class Schedule** will take precedence and be enforced. In the event circumstances warrant a modification of the due-date of an assignment, the change will be announced in a prominent location in the course (the Virtual Classroom or Announcement section) and the Class Schedule will be updated accordingly. Should you find a discrepancy of dates within the course, please notify the instructor as to its exact location so it can be corrected.

Make-up and extra credit assignments

No make-up, extensions, resubmissions, or extra credit assignments are available in this course. Credit is earned exclusively by completing the required activities, as assigned, and submitting them by the due date, in the designated location.

ASSESSMENT OF PROGRAM OUTCOMES

The Comprehensive Examination responses will also be utilized to assess the program outcomes identified in the Course/Program Student Learning Outcomes in the Course Information section above. This assessment of Institutional Effectiveness is programmatic in nature and results are not reflected in course grades.

TECHNOLOGY REQUIREMENTS

General Technology Requirements

This is an online course; thus, access to a modern computer with a reliable, high-speed, Internet connection is required. You must also have sufficient administrative authority on your computer to download, install, and run the necessary software applications. Below are the technical requirements...

LMS Requirements:

<https://community.brightspace.com/s/article/Brightspace-Platform-Requirements>

LMS Browser Support:

https://documentation.brightspace.com/EN/brightspace/requirements/all/browser_support.htm

Course-specific Software/Hardware/Peripherals

Students will make use of the following software application to complete course assignments:

MS Word

ACCESS AND NAVIGATION

This course will be facilitated using Desire 2 Learn (D2L) Brightspace, the Learning Management System (LMS) used by Texas A&M University-Commerce. The university refers to this on-line course environment as “myLeo On-line.” To get started with the course, access myLeo On-line through your myLeo Portal, or go directly to: <http://myLEOonline.tamuc.edu/>

You will need your Campus-Wide ID (CWID) and password to log in to the course. If you do not know your CWID or have forgotten your password, contact the Center for IT Excellence (CITE) at 903.468.6000 or helpdesk@tamuc.edu.

To participate in the online course environment, login to the course in myLeo On-line and follow the instructions provided in the course. Instructions, project guidelines, and relevant resources will be provided as needed throughout the course. The Virtual Classroom should be monitored and contributed to regularly. Special announcements or instructions may also be placed in the Announcements, the Virtual Classroom, or sent directly to your Leo email, which should be monitored regularly throughout your enrollment at TAMU-C.

If you would like to access your D2L courses on your mobile device, you can search your device's app store for the free [Brightspace Pulse](#) app by D2L Corporation.

Note: Personal computer and internet connection problems do not excuse the requirement to complete all course work in a timely and satisfactory manner. Each student needs to have a backup method to deal with these inevitable problems. These methods might include the availability of a backup PC at home or work, the temporary use of a computer at a friend's home, the local library, office service companies, coffee shop, a TAMUC campus computer lab, etc.

COMMUNICATION AND SUPPORT

Interaction with the Instructor

The instructor is available via a variety of avenues. The best method depends on the nature of the content you wish to communicate. If you have a general question about the class content, the syllabus and course materials are provided within the courseware environment and may already provide the answer you seek. If you have a question or comment of the nature that would be presented in a traditional classroom environment, please do so in the Virtual Classroom so that others might benefit from and participate in the exchange. If you know the answer to a fellow student's question, please respond. Personal content involving grades, progress, etc. should be addressed with me via private e-mail: Jason.Davis@tamuc.edu. Your name, CWID, and course number (if regarding a specific course) **must** be included in ALL electronic correspondence. All class related E-mail correspondence must also have the following in the subject line:

TMGT 599 - *First Name Last Name, subject of correspondence*

To help ensure the safety, health, and well-being of our colleagues and students, advising and course activities will be conducted via on-line means, to the extent possible. Email is the preferred means of communication and if email proves to be insufficient for communication on a particular topic, an on-line meeting may be coordinated. Note that telephone and voice mail contact are not an appropriate or reliable means of contacting the instructor as the line and voice mailbox are not actively monitored and will be removed in the coming days.

.D2L Brightspace (MyLeo On-line) Technical Support

Need Help?

Student Support - If you have any questions or are having difficulties with the course material, please contact your Instructor.

Technical Support - If you are having technical difficulty with any part of Brightspace, please contact Brightspace Technical Support at 1-877-325-7778. Other support options can be found here:

<https://community.brightspace.com/support/s/contactsupport>

MyLeo Portal/University Computing Resources

Technical Support – If you are having any difficulty accessing the myLeo portal, please contact the Center for IT Excellence Help Desk at 903-468-6000 or HelpDesk@tamuc.edu 24 hours a day, 7 days a week except university holidays.

CWID & Password resources

To find your CWID: [Find your CWID](#)

To reset your password: [Reset your password](#)

Writing Assistance

Both on-site and online writing assistance is available through the University Writing Center. The Writing Center is dedicated to helping writers take advantage of all opportunities for learning inherent in the writing process; to that end, center tutors can assist writers at any stage of the writing process. By working with students one-on-one or in small groups, tutors can help writers analyze the rhetorical demands of the writing task, generate and focus ideas at the prewriting stage, ensure they are addressing the writing assignment directly and effectively, elaborate and rework a rough draft after hearing the writer read the draft aloud, discover their strengths and weaknesses in a particular rhetorical context, strengthen arguments, spot weak rhetorical choices and make more effective choices, and address formatting or other surface-level concerns. At no point do center tutors write these papers for the students. All writers working in the Writing Center maintain control of their work; tutors simply offer support and feedback and ask questions they may not have been asking themselves (or may not have even known to ask themselves).

For more information refer to the Writing Center's web pages at:

<https://www.tamuc.edu/writing-center/>

Other Questions/Concerns

Contact the appropriate TAMU-C department relating to your questions/concern. If you are unable to reach the appropriate department with questions regarding your course enrollment, billing, advising, or financial aid, please call 903-886-5511 between the hours of 8:00 a.m.- 5:00 p.m., Monday through Friday.

COURSE AND UNIVERSITY PROCEDURES/POLICIES

Student Guidebook

The current [Graduate Student Guide](#) is available here:

<https://inside.tamuc.edu/academics/graduateSchool/documents/Graduate%20Student%20Guide.pdf>

Academic Integrity/Academic Honesty Procedure

Texas A&M University-Commerce does not tolerate **plagiarism** and other forms of academic **dishonesty**. Plagiarism represents disregard for academic standards and is strictly against University policy. Plagiarized work can result in a "0" on a given assignment(s) or an "F" for the course as well as further administrative sanctions permitted under university procedures. You

may discuss course work and other course materials with fellow students (except during tests), but it is inappropriate to have another student, or anyone else, do your course work or provide you with any portion of it. Further, assignment responses written by or purchased from a third-party writer may not be submitted in part or whole to satisfy assignment requirements.

Conduct that violates generally accepted standards of academic honesty is defined as academic dishonesty. "Academic dishonesty" includes, but is not limited to, plagiarism (the appropriation or stealing of the ideas or words of another and passing them off as one's own), auto-plagiarism (duplicate submission of single work for credit in multiple or repeated classes), patch-writing (attempting to paraphrase by replacing selected words at intervals within a quotation with words of similar meaning), cheating on exams or other course assignments, collusion (the unauthorized collaboration with others in preparing course assignments), forgery (representing yourself as some else on a document, signing a roster on another student's behalf, soliciting or conspiring to commit a written misrepresentation of identity, etc.), and abuse (destruction, defacing, or removal) of resource material. All works submitted for credit must be original works created **by the scholar** uniquely for the class. Works submitted are subject to submission to TurnItIn, or other similar services, to verify the absence of plagiarism. Consequences of academic dishonesty may range from reduced credit on the plagiarized assignment to petition for removal from the academic program or institution, depending on the circumstances and extent of the violation; however, in typical instances, an automatic F on the assignment is considered appropriate as a minimum consequence.

Assignments and questions utilized in coursework and examinations are to be considered the intellectual property of the instructor and the university, with applicable copyright restrictions, and MAY NOT be distributed or shared outside the class. This includes the distribution of content to other students not currently enrolled in the class and the uploading of course content to external databases or third party, commercial websites. Any student doing so may be held accountable as a violation of academic honesty.

Also, be aware that the statute of limitations for penalties for plagiarism does not end upon the completion of the course or even upon graduation. If an instance of plagiarism is found anytime after the completion of the course, the course grade is subject to change accordingly and any awarded degree utilizing the course is subject to revocation.

For additional information on the obligations and consequences regarding plagiarism and academic dishonesty, refer to the University Procedure [13.99.99.R0.10 Graduate Student Academic Dishonesty](#).

<http://www.tamuc.edu/aboutUs/policiesProceduresStandardsStatements/rulesProcedures/13students/graduate/13.99.99.R0.10.pdf>

University AI use rules [Draft 2, May 25, 2023]:

Texas A&M University-Commerce acknowledges that there are legitimate uses of Artificial Intelligence, ChatBots, or other software that has the capacity to generate text, or suggest replacements for text beyond individual words, as determined by the instructor of the course.

Any use of such software must be documented. Any undocumented use of such software constitutes an instance of academic dishonesty (plagiarism).

Individual instructors may disallow entirely the use of such software for individual assignments or for the entire course. Students should be aware of such requirements and follow their instructors' guidelines. If no instructions are provided the student should assume that the use of such software is disallowed.

In any case, students are fully responsible for the content of any assignment they submit, regardless of whether they used an AI, in any way. This specifically includes cases in which the AI plagiarized another text or misrepresented sources.

Course AI use rules:

For purposes of this course and its activities, Generative AI, ChatBots, or similar AI engines are considered external resources, just as any other external references; and, as such, any content acquired from these sources is to be properly cited and referenced accordingly. Additionally, the prompt provided to the AI engine to generate any included responses or content is to be provided and an appropriate explanation incorporated in the text to provide context for the material.

APA guidelines for citing AI sources should be consulted and applied for proper formatting of citations and references. APA's guide and examples on [How to cite ChatGPT](https://apastyle.apa.org/blog/how-to-cite-chatgpt) and similar AI sources can be found here: <https://apastyle.apa.org/blog/how-to-cite-chatgpt>

Avoiding Plagiarism

To avoid plagiarism, an individual must give credit whenever they:

- a) use another individual's idea, opinion, or theory;
- b) use facts, statistics, graphs, and drawings that are not common knowledge;
- c) use quotations of another individual's spoken or written words;
- d) paraphrase another individual's spoken or written words; or
- e) use any content generated by a generative AI or other similar engine.

Any works referenced must be properly cited and referenced in accordance with APA 7th edition style.

Web resources for additional reference regarding what constitutes plagiarism and how to avoid it include:

- <http://www.plagiarism.org/>
- <https://apastyle.apa.org/blog/how-to-cite-chatgpt>
- <http://www.unc.edu/depts/wcweb/handouts/plagiarism.html>
- <http://www.indiana.edu/~wts/pamphlets/plagiarism.shtml>
- <https://guides.centralpenn.edu/academicintegrity/avoidingplagiarism/patchwriting>

An excessive Similarity Score, as indicated by TurnItIn or similar plagiarism detection tool, on any written assignment, including Comps or the Course Project, is an indication of either Academic Dishonesty OR a lack of acceptable knowledge regarding how to properly credit sources. Neither of these is acceptable and will lead to an undesirable outcome on Comps, or the course, or both. A Similarity Check Dropbox is provided in the course as a courtesy so that you may submit your work to verify that your similarity score is in an appropriate range BEFORE submitting your final work to the official Dropbox folder designated for the particular activity. You may submit, revise, and resubmit your documents to this Dropbox as many times as necessary to achieve an appropriately low score.

So, what is an appropriate range? As the Similarity Score is an indication of how much of your work can be found in previously published works, the lower the score the better. It is not unusual for students to submit works, particularly on Comps, that score from 0% to 3%. On the other end, if you submit work that shows to be 25% (1/4 or more plagiarized, either intentional or due to improperly crediting), expect a serious issue and very likely an F. If your score exceeds 33% (1/3+ plagiarized), expect an F on the activity as there is simply no excuse for that high of a Similarity Score if you did the work yourself and credited properly.

Here's the general scale based on the recommendations of the Program Advisory Committee:

0%-7%	Excellent (Shoot for the bottom end of this range.)
8%-14%	Acceptable
15%-24%	Probably OK, but similarity report will likely be checked to be sure there are no serious issues.
25%-32%	Likely NOT OK, will undergo similarity report evaluation and an F is very likely.

33%+ Definitely NOT OK, will undergo similarity report evaluation and an F is almost assured.

Note that TurnItIn may include assignment questions in the similarity analysis which can result in a higher similarity score shown in the submission folder. If this occurs, the score will be manually adjusted by the instructor to remove percentages of similarity detected in assignment questions and reflect only the percentage of similarity detected in student generated responses. This adjustment will be noted in the instructor's official grading spreadsheet and will not be visible in the submission folder.

The university's adopted [Graduate Student Academic Dishonesty procedure](#) takes a strong stance against violations of academic integrity. This opportunity to check your Similarity Scores prior to final submission will help you to address any issues that might otherwise arise to avoid any undesirable consequences resulting from an unintentional instance of Academic Dishonesty.

Documents submitted to the Similarity Check Dropbox will not be collected or graded. Comps and Assignment Documents are not officially submitted, and do not count for credit, until they are posted to the specified location designated for that specific assignment.

Scholarly Expectations

Work submitted, particularly at the graduate level, is expected to demonstrate higher-order thinking skills and represent the student's best possible effort on the assignment. A student should NEVER ask an instructor what they made on a particular assignment for the purpose of determining how much effort to put into the next assignment. Any effort, on any activity, that is less than the student's best is insufficient and will likely, and rightfully, be reflected in the grade. If a passing grade is desired in this course, it must be demonstrated by virtue of your performance throughout the course. Further, work submitted at the graduate level is expected to be of significantly higher quality and created with a significantly higher degree of self-direction than work produced at the undergraduate level.

Students are expected to demonstrate an ability to correctly follow directions and perform in accordance with assignment requirements in terms of content, submission, and timeliness and communicate with the instructor and fellow students in a respectful and professional manner. Further, students are expected to be able to accomplish these responsibilities with a significant degree of independence and not expect to habitually contact the instructor to provide additional interpretation of clearly stated assignments, correct your work prior to submission, and provide continual "hand-holding" to function academically. A student anticipating a career related to the field of Technology Management, in particular, is expected to exercise and demonstrate advanced skills and self-sufficiency in dealing with technology, computing resources, specialized applications, and technical issues. Grading standards are typically such that failure to adhere to these basic expectations will be reflected in the grade. This is as it should be. A student who does not demonstrate the ability to independently follow instructions correctly, conduct any necessary background research, and produce work that meets the identified project standards will not likely earn an A in this course. A grade of A in such case would misrepresent a student's ability to perform at a high standard to a potential employer or supervisor evaluating their transcript.

Late Work

Late Comps submission is not permitted and will result in an immediate failure of the Examination. Course projects and assignments MUST be completed and submitted by the designated due dates. Full credit cannot be earned by late or incomplete course assignments. Assignments can lose up to 10% of their possible value each day late if submitted after the posted due date/time. (e.g. Assignments can lose all their value at 10 days past due.) Further, **late project submissions may be rejected** at the instructor's discretion. If a project incorporates peer review activities requiring that all projects be available at the beginning of the review period, one student

will not be permitted to hold up the progress of the entire class and may be taken “out of the loop” if necessary to ensure the forward progress of the class.

Time Commitment (16-week term)

In a college-level course, it is a reasonable and accepted expectation that a student will spend between three and four hours outside of class for each hour spent in class. This applies to on-line and blended courses just as it does to a tradition course when determining the total expectation of time that should be spent on a particular course per week, or day in the case of summer or sub-term courses. The activities in this course are based on a 15-week instruction schedule. An understanding of this expectation can help serve as a gauge for you to determine a range of how much time you will need to allow for and devote to each course. The average time commitment range calculation for a 16-week, three Semester Credit Hour (3 SCH) course, such as this one, is shown in the following table. To frame the expectation in a real-world perspective, the workload of two 3 SCH courses taken in a 16-week format could be roughly equated to that of a half-time, 20 hour per week job, for the duration of the courses.

Average expected time spent on class or class related work.	Minimum expected average time based on 3:1 time ratio.	Maximum expected average time based on 4:1 time ratio.
“In” class per class week	4hr. 00min.	4hr. 00min.
“Outside” class per class week	12hr. 00min.	16hr. 00min.
TOTAL Weekly Expectation	16hr. 00min.	20hr. 00min.
TOTAL Term Expectation	160hr. 00min.	200hr. 00min.

Attendance

All students must be active participants in class activities, whether in the classroom or on-line. In on-line courses, attendance is equated to the demonstration of an active, regular presence in the virtual course environment and appropriate progress toward timely assignment completion. An active presence may be shown through participation in, and contributions to, on-line class discussions and the Virtual Classroom. Regular attendance and assignment submissions are essential for success. If an extended situation arises during the course of the semester that prevents you being able to perform to a level allowing you to earn the grade you desire, it may likely be in your best interest to drop the course and re-enroll later. If you’re planning an extended trip or vacation, are adversely impacted by an environmental situation, or have any other obligation (engagement, wedding, medical procedure, family matters, etc.) during the semester that will interfere with your ability to participate as necessary to enable the opportunity for your success in the course, this will not be the time for you to take this class. Go ahead, drop the class, enjoy your time away or vacation or take care of any other timely obligations, and re-enroll in a semester in which you are ready and able to dedicate the time and effort necessary to be successful in your studies. Bottom line... Academic studies require significant effort and dedication. Either you’re all in and committed, or you need to step back until you’re ready and able to rise to the challenge.

For more information about the attendance policy please visit the [Attendance](#) webpage and [Procedure 13.99.99.R0.01](#).

Surveys/Course Evaluations

Your feedback will be requested by Texas A&M University-Commerce during the semester/term regarding your course. *It is important that you take a serious and constructive approach to this activity.* The information gained from you will assist in course evaluation by the

university/college/department to ensure that effective learning is taking place within the existing course structure. If changes are indicated, this will help with course re-design and/or other revisions that will make the course more relevant for future students and the employers of graduates.

Drops & Withdrawals (and understanding the difference)

Drop – Removal of the student from one or more courses while remaining actively enrolled in one or more remaining courses in a given semester. A drop must be initiated by the student, with reason, subject to instructor approval, or it may be initiated by the instructor in the case of excessive absences, at the discretion of the instructor. Drop requests **must** be submitted on or before the drop deadline. A student **may not** be dropped from a single course after the drop deadline is passed. Requests to drop a course are submitted via the student's [myLEO](#) account.

Withdrawal – Elective removal of the student from **ALL** courses in which they are enrolled in a given semester. A withdrawal request must be initiated by the student submitting the official [Withdrawal Form](#) to the Office of the Registrar on or before the last day to withdraw. Withdrawals **cannot** be initiated by instructors and do not require instructor approval; however, the student should notify their instructor(s) of their intent **prior** to initiating the withdrawal process.

During the open registration period at the beginning of the semester, students may add or drop courses without specific authorization (prerequisite requirements and permission-only courses excepted). Should the student determine it to be necessary to drop the course, or withdraw from the semester, it is the student's sole responsibility to submit the proper request **PRIOR** to the official deadlines to complete either of these actions. Drop/Withdrawal requests may **NOT** be submitted through your instructor and informing your instructor of your intent to take either action does not constitute your official request to do so. Instructor approval is required to drop the course after the end of the open-enrollment period and prior to the drop deadline. The student **cannot** be dropped after the drop deadline or withdraw after the withdrawal deadline. (This is university procedure, NOT an instructor decision.) The instructor is **required** to submit the actual grade earned by each student remaining on the official roster after the withdrawal deadline, regardless of the level of grade attainment.

Important: The student must contact their course instructor and academic advisor to determine what effect the drop/withdrawal will have on their academic progress **prior** to initiating either action.

The student is responsible for confirming official university dates/deadlines and meeting any and all necessary deadlines pertaining to drops & withdrawals. In the event of a discrepancy between a date provided in the course and a date on the [official university calendar](#), the date on the official university calendar, or revised date officially announced by the registrar or other authorized university official, will take precedence.

Grade of "X" (Incomplete)

In accordance with the Academic Procedures stated in the TAMU-C Graduate Catalog and [University Procedure 13.99.99.R0.06 Computation of Grade Point Averages](#), "students who because of circumstances beyond their control are unable to attend classes will, **upon approval of their instructor**, receive a mark of X (incomplete) in all courses in which they were maintaining passing grades." The mark of "X" is rarely applicable and will only be considered in strict compliance with University Rules upon submission of complete medical or other relevant documentation. This action is intended to serve as an emergency measure only in the event a qualifying situation occurs after the course's withdrawal deadline date, prior to which a student would be able to withdraw from their courses due to unforeseen circumstances. The maximum allowable extension in this course, beyond the final class day, will generally be the duration of time between the specific event (documented debilitating injury, serious incident, etc.) warranting the mark of "X" and the final class day, plus one week. Any variation from this completion timeline will be based on the nature and severity of the emergency. Recording a grade of "X"

requires the filing of a [Plan for Completion](#). Discovery of an impending failure of a course, although personally disappointing, DOES NOT constitute an emergency in academia and does not meet the criteria for the assignment of an incomplete. Once an incomplete has been assigned, the student cannot drop or withdraw from the course and a grade must be assigned.

Student Appeal of Instructor Evaluation

The university defines a specific procedure for appealing a final grade in a course. It is important to note that individual assignment grades are **not** subject to appeal. Students who wish to appeal a final course grade **must follow the university's designated chain of command**, starting with the course instructor and a subsequent appeal, if appropriate, must then be made to the head of the department in which the course is offered, and ultimately the Dean of the College as a final step. In accordance with the University's procedure for [Student Appeal of Instructor Evaluation](#),

Students challenging a final grade must show that the instructor's judgment was unfair based on: some basis other than performance; standards different from those applied to other students in the same course section; or a substantial, unreasonable, and/or unannounced departure from previously articulated standards or the syllabus. Students may not use this process to appeal grades for individual assignments. (Graduate Catalog, [Student Appeal of Instructor Evaluation](#) section)

Appeals Chain of Command

The appeals process does **not**, in any scenario, involve any administrative official beyond the College Dean. Circumventing the required process or breaking the chain of command established for such an appeal by inappropriately involving a university administrator not specifically included in the appeal process demonstrates blatant disregard for university procedures and disrespect for the administrator's time and authority, as well as undermines the authority of those who are legitimately in the path of appeal. Further, such inappropriate action calls into question the student's dedication to "compliance with ethical and professional standards" and thus their suitability for continuation as a major in the program (Procedure [13.99.99.R0.13 Good Academic Standing](#), section 1.4). Also see the related procedural provision: "4. Individual departments may reserve the right to dismiss from their programs students who, in their judgment, would not meet the professional expectations of the field for which they are training" ([13.99.99.R0.39 Graduate Academic Probation, Retention, and Suspension](#), 2022, Section 4, p. 4).

Students with Disabilities - ADA Statement

The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you have a disability requiring an accommodation, please contact:

Office of Student Disability Resources & Services
Texas A&M University-Commerce
Velma K. Waters Library, Room 162
Phone (903) 886-5150 or (903) 886-5835

Fax (903) 468-8148

StudentDisabilityServices@tamuc.edu

[Office of Student Disability Resources and Services](#)

<http://www.tamuc.edu/campusLife/campusServices/studentDisabilityResourcesAndServices/>

No variations in assignment requirements or expectations can be granted by the instructor without prior documented authorization directly from the Office of Student Disability Resources & Services. Requests for accommodation cannot be presented directly to the instructor by the student. Only requests routed through and received directly from the Office of Disability Resources & Services can be acted upon by an instructor. It can take time to process and implement accommodations, so if you qualify and think there is any possibility you might need to request them during the course, it is advisable to contact the Student Disability Resources & Services office at the beginning of the semester to establish a relationship with one of their advisors.

Non-Discrimination Statement

Texas A&M University-Commerce will comply in the classroom, and in online courses, with all federal and state laws prohibiting discrimination and related retaliation on the basis of race, color, religion, sex, national origin, disability, age, genetic information, or veteran status. Further, an environment free from discrimination on the basis of sexual orientation, gender identity, or gender expression will be maintained.

Mental Health & Well-Being

The Counseling Center at A&M-Commerce, located in the Halladay Building, Room 203, offers counseling services, educational programming, and connection to community resources for students. Students have 24/7 access to the Counseling Center's crisis assessment services by calling 903-886-5145. For more information regarding Counseling Center events and confidential services, please visit www.tamuc.edu/counsel

University Counseling Center:	903-886-5145
National Suicide Prevention Lifeline:	1-800-273-8255
University Police (in case of imminent danger):	903-886-5111 (or 9-1-1)

University Guidance for Students on Campus during Pandemics or other Public Health Crises

Please, monitor announcements provided on the University Homepage for updated information, advisories, directions, and requirements pertaining to A&M Commerce's response to health-related or other crises. <https://www.tamuc.edu>

Research Studies/Human Subjects

Refer to the **Texas A&M University-Commerce** Rules & Procedures [15.00.01.R0.01-Human Subject Protection](#) & [15.99.03.R1 Ethics in Research, Scholarship, and Creative Work](#).

<https://inside.tamuc.edu/aboutus/policiesProceduresStandardsStatements/rulesProcedures/15ResearchPrograms/15.99.01.R1.pdf>
<https://inside.tamuc.edu/aboutus/policiesProceduresStandardsStatements/rulesProcedures/15ResearchPrograms/15.99.03.R1.pdf>

Campus Concealed Carry Statement

Texas Senate Bill - 11 ([Government Code 411.2031](#), et al.) authorizes the carrying of a concealed handgun in Texas A&M University-Commerce buildings only by persons who have been issued and are in possession of a Texas License to Carry a Handgun. Qualified law enforcement officers or those who are otherwise authorized to carry a concealed handgun in the State of Texas are also permitted to do so. Pursuant to [Penal Code \(PC\) 46.035](#) and A&M-Commerce [Rule 34.06.02.R1](#), license holders may not carry a concealed handgun in restricted locations. For a list of locations, please refer to please refer to the [Carrying Concealed Handguns On Campus](#)

document and/or consult your event organizer.

<http://www.tamuc.edu/aboutUs/policiesProceduresStandardsStatements/rulesProcedures/34SafetyOfEmployeesAndStudents/34.06.02.R1.pdf>

Pursuant to [PC 46.035](#), the open carrying of handguns is prohibited on all A&M-Commerce campuses. Report violations to the University Police Department at 903-886-5868 or 9-1-1.

Student Conduct/Citizenship

All students enrolled at the University shall follow the tenets of common decency and acceptable behavior conducive to a positive learning environment. The Code of Student Conduct is described in detail in the [Student Guidebook](#).

http://www.tamuc.edu/student_guidebook/Student_Guidebook.pdf

Students should also consult the Rules of Netiquette for more information regarding how to interact in an online forum:

<http://www.albion.com/netiquette/corerules.html>

<https://www.britannica.com/topic/netiquette>

Students are expected, at all times, to recognize constituted authority, to conform to the ordinary rules of good conduct, to be truthful, to respect the rights of others, to protect private and public property, and to make the best use of their time and effort toward the educational process.

All students' work in this class will be evaluated and scored fairly and impartially based on the quality of work submitted and strict adherence to assignment guidelines. It is improper conduct to contact an instructor to ask that work be reconsidered to earn a particular grade after grades have been posted to the class gradebook and/or to the registrar. Grades assigned are a reflection of the scores earned by the student, not a random or negotiable assignment by the instructor. If a particular grade is desired or necessary, it is the student's **sole** responsibility to fully participate in the class and submit work of sufficient quality to legitimately earn that grade.

At no time is a student allowed to exchange dialog with, make requests of, or make implications to a member of faculty that could be construed as a request for, or expectation of, preferential or differential treatment among members of a class. A student may not place an instructor in a position in which there is an expectation by the student that (s)he will be evaluated, assessed, or given consideration in a manner inconsistent with that of the entire class. All students within a class will be held to an identical standard of expectation and assessment, within the law.

Appeals of instructor evaluation must be made in accordance with the required progression through the academic chain of command and within the timeline established in [University Procedure 13.99.99.R0.05 Student Appeal of Instructor Evaluation](#). Only final course grades are subject to appeal based on criteria identified in Section 1.2 of this procedure. Grades of individual assignments within a course are not eligible for appeal. Students must first discuss any concerns with the instructor before an appeal may be filed. Attempted circumvention of the prescribed chain of command, except as allowed in the procedure, is a breach of the university's required procedural process and student responsibility.

This Syllabus and the Syllabus Change Procedure

This syllabus constitutes the contractual document between faculty and students in the course. A student's continued enrollment in the course following the posting of the final, official syllabus at the beginning of the term signifies the student's understanding of and complete acceptance of this contract and the procedures, requirements, and evaluation criteria contained herein. Any student not accepting this syllabus is to immediately drop this course. The syllabus identifies credit-earning activities for which you will be responsible to submit in the course. The occasion of a need to vary from the original syllabus is rare; however, unforeseen circumstances and logistical issues could arise during the course of a semester that necessitates a minor

modification in the originally planned activities or procedures. Changes to a syllabus are not made without sufficient justification and assurance that any changes implemented would not impact the students' ability to complete the course. Any variations that may be determined necessary during the course by the instructor will be appropriately announced in the courseware along with relevant information pertaining to the modification and an updated version of the syllabus will be provided.

INSTRUCTOR SCHEDULE / COURSE OUTLINE / COURSE SCHEDULE

My schedule is available in the course and maintained on my public website at:
<http://faculty.tamuc.edu/jdavis/schedule/>

Anticipated On-campus Office Hours: Tuesdays 1:15pm - 4:45pm.

Anticipated Virtual Office Hours: Wednesdays 10:00am - 11:30pm

Contact me **via email** to schedule and confirm any office or online meetings.

The course schedule and calendar are available in the course and is maintained on our class' public website at: <http://faculty.tamuc.edu/jdavis/tmgt/599/248/>

Any revision of dates or activities on the active schedules linked above will take precedence over those on the tentative schedules shown here. Students will need to monitor and reference these resources regularly for any updates/revisions.

Course Activity Schedule

Date	Activity
Monday, August 26 Week 1	First Class Day. Review the course syllabus and complete any preliminary course activities specified. Review the course Academic Honesty Policy-provided in the course. If you are completing all remaining coursework this semester, Apply for Graduation.
Weeks 2-5	Master's Comprehensive Examination (Not for class credit)
Friday, Sept. 27, 5:00pm	Master's Comprehensive Examination Submission Due NO LATE SUBMISSIONS ACCEPTED
Weeks 6-15	Course Case Study Project Activity
Week 15 – Tuesday, Dec. 3	Submit Final Course Case Study Project for full-credit eligibility
Week 16 - Wednesday, Dec. 13	Submit Exit Survey (if administered)
<i>Friday, Dec. 13</i>	<i>Graduate Commencement Ceremony</i>
