Matlab Editor

To open an existing *.m* file into the Matlab Editor Go to the Menu Bar on the top. Select File, go to the folder your *.m* file is located, then select Open.

To open an empty screen where you may write your Matlab code Go to t Menu Bar on the top and select Desktot. A window will drop. Select Editor. Then a new window will open. In this window Go to File and click. A window will drop. In this Window select and click on New. Then click on Script, and an empty screen will be open in the Editor.

Type your program in the empty screen following the syntax rules. When you are Ready save your code as an *.m* file in the folder selected by you.
