INTRODUCTION
The Southern Agricultural Economic Association (SAEA) holds its annual meeting from Saturday to Tuesday during the first week of February. The primary objective of the conference is to network and disseminate the latest scientific information related to the economics and agribusiness aspects of the production, distribution, and marketing of food or fiber. Selected students, faculty, and researchers participate in an undergraduate Quiz Bowl, research poster presentations, and research paper presentations.

In the SAEA Quiz Bowl, undergraduate students are placed in teams of 4 composed by students from all participating universities. Students learn from their peers about themselves and their universities, and compete in a jeopardy-like game where they answer questions related to their discipline (Micro-economics, Macro-economics, Agribusiness & Finance, Resource & Policy, Quantitative, Marketing, Management, and Potpourri). While at the conference, students also attend research poster and paper presentations.

HOW THE QUIZ BOWL WORKS
In the SAEA Quiz Bowl, students are randomly placed into teams of usually 4 students who are subsequently randomly assigned to compete in Round 1 at different time slots and rooms (such as rooms D, E, or F in Fig. 2 and Fig. 3). In 2015, there were 28 teams which started playing Round 1 at 9:00 am, 9:20 am, 5:40 am, or 10:00 am (Fig. 2). Teams that win remain in the winner bracket (Fig. 2) while teams that lose move to the loser bracket (Fig. 3). Any team that loses two times is eliminated.

There are usually around 15 rounds. Each round lasts 15 minutes. The flip of a coin decides which team picks first. The team to last answer a question correctly gets to pick a question. When a team answers incorrectly, the other teams takes the board.

In each round, there are two teams competing, one moderator who reads the question aloud, one computer operator who is also the time keeper, and usually two judges who decide whether the teams answered right or wrong. After the moderator finishes reading a question, the teams have 10 seconds to answer the question. A team may buzz in before the moderator finishes reading the question. If a team buzzes in to answer a question, the 10 second rule pauses. If a team answers wrong, the other team has a chance to answer as long as the 10 seconds are not up.

Professional conference participation provides experiential learning activities for agribusiness and agricultural economics students.

Such activities reinforce the student learning in several subjects, including Micro- and Macro-economics, Agribusiness and Finance, Resource and Policy Economics, Quantitative Methods, Marketing, and Management (Fig. 1).

Benefits
Professional conference participation provides experiential learning activities for agribusiness and agricultural economics students.

Students also get to appreciate and see what their discipline is all about outside their classroom.

Note: Poll was conducted in 2017 only. Sample size equals 7, which includes 6 undergraduate students and 1 graduate student. Response rate = 77.78%.

Overall, the post-conference poll indicates A&M-Commerce students who participated at the 2017 SAEA Annual Meeting in Mobile, Alabama, February 4-7, 2017 liked the conference and that the experience increased their interest in graduate studies.

ACKNOWLEDGEMENTS
The author gratefully acknowledge the SAEA leadership in putting together all conference activities. The views expressed in this poster solely represent those of the author, who remains responsible for any misinterpretation of the SAEA Quiz Bowl rules.
